MARKET ENVIRONMENT

NEPC, LLC

PERFORMANCE OVERVIEW

Q4 Market Summary

Macro			Equity			Credit			Real Assets		
US Dollar	VIX	US 10-Yr	S&P 500	MSCI EAFE	MSCI EM	US Agg.	High Yield	Dollar EMD	Oil	Gold	REITS
											
1.1%	13.3	-38 bps	-13.5%	-12.5%	-7.5%	1.6%	-4.5%	-1.2%	-38.0%	7.7%	-6.0%

- **Global equities sold-off during the quarter due to concerns related to fed funds rate increases , fears of a global slowdown, and trade uncertainties**
- **The sharp decline in crude oil prices weighed on commodities overall and US high-yield bonds, which have meaningful portion to the energy sector**
- **The Federal Reserve hiked rates for the fourth time in 2018 with one to two additional rate increases expected for 2019**

Market segment (index representation) as follows: US Dollar (DXY Index), VIX (CBOE Volatility Index), US 10-Year (US 10-Year Treasury Yield), S&P 500 (US Equity), MSCI EAFE Index (International Developed Equity), MSCI Emerging Markets (Emerging Markets Equity), US Agg (Barclays US Aggregate Bond Index), High Yield (Barclays US High Yield Index), Dollar EMD (JPM Emerging Market Bond Index), Crude Oil (WTI Crude Oil Spot), Gold (Gold Price Spot), and REITs (NAREIT Composite Index).

EQUITY PERFORMANCE OVERVIEW

Q4 Equity Market Summary

- **US equities led the global equity sell-off and developed market indices moved into a bear market**
- **Equities markets were volatile as ongoing trade concerns and fears of global growth slowdown weighed on investor sentiment**

Russell 3000 QTD Sector Return Contribution	
Information Technology	-3.35%
Consumer Discretionary	-1.80%
Financials	-1.80%
Industrials	-1.82%
Consumer Staples	-0.35%
Energy	-1.42%
Materials	-0.43%
Health Care	-1.52%
Real Estate	-0.22%
Communication Services	-1.64%
Utilities	0.02%

CREDIT PERFORMANCE OVERVIEW

Q4 Credit Market Summary

- **Credit spreads broadly increased across most areas of the market**
- **Riskier assets underperformed as demand for high quality and safe-haven assets increased**
- **Bank loans declined by 3.4% as market outflows weighed on asset prices**

Credit Spread (Basis Points)	09/30/18	12/31/18	Δ

INVESTMENT MANAGER – Q2 FISCAL 2019 COMMENTARY

POSITIVE CONTRIBUTORS

	Commentary	Due Diligence Rating
Champlain <i>Small/Mid Cap Equity</i>	<p>Returned -15.7%, outperforming the custom benchmark, 50% R2000/50% R2500, by 360 bps</p> <p><i>Contributors:</i> For the quarter, the portfolio benefited from strong stock selection and overweight in consumer staples as investors sought out stable and predictable business models amid this quarter’s market volatility. Outperformance also came from their insurance holdings within financials. Technology holdings outperformed with Red Hat as their largest contributor to overall performance after it agreed to be acquired by IBM. Additionally, avoiding cyclical sectors (i.e. energy and utilities) also benefited the portfolio.</p> <p><i>Detractors:</i> Healthcare saw significant declines during the quarter. While the strategy’s overweight position detracted, positive stock selection partially offset the negative contribution. Healthcare company, Intergra Life Sciences, was one of the largest detractors for the portfolio. Stock selection in industrial holdings slightly underperformed the benchmark coming from two food equipment manufacturing companies as both reported weaker than expected results.</p> <p><i>Positioning:</i> Champlain seized upon the widespread selling and attractive discounts to their estimated Fair Values by becoming fully invested in the final weeks of December. If we are headed for a recession, they have an opportunity to shift more capital away from the most economically resilient holdings into their favorite industrial and software holdings that could potentially trade at steeper discounts than today and present greater relative value as compared to the more defensive holdings.</p>	1
Mondrian <i>International Equity</i>	<p>Returned -9.8%, outperforming the MSCI EAFE by 270 bps</p> <p><i>Contributors:</i> Allocations to both Asia and Europe added to relative returns. In Asia, the portfolio benefited from the overweight positions in Hong Kong and Singapore, which were relatively defensive as expectations for US interest rate increases moderated in response to capital market volatility and signs of weaker economic growth. Strong stock selection in Spain, Italy, and Japan. Enel, the Italian utility, rose strongly after publishing an updated strategic plan to grow their dividends. Sector allocation added to performance by the overweight positions in utilities and communication sectors.</p> <p><i>Detractors:</i> In the context of Brexit-related uncertainty, the portfolio’s positions in domestically-oriented UK stocks detracted. Economically sensitive sectors produced the weakest returns, with the energy sector performing the worst as oil prices fell precipitously.</p> <p><i>Positioning:</i> Increased holdings in selected companies in response to recent share price weakness, including Lloyds Banking Group and SSE in the UK, as well as Takeda, Mitsubishi Electric, WH Group, Evonik and Saint Gobain. To fund these, they have reduced positions in certain stronger performing securities, including Enel, Telefonica, Ahold, Delhaize, and Novartis.</p>	1

INVESTMENT MANAGER – Q1 FISCAL 2019 COMMENTARY

POSITIVE CONTRIBUTORS

	Commentary	NEPC Rating
Aberdeen Emerging Market Equity	<p>Returned -3.4%, outperforming the MSCI Emerging Markets by 410 bps</p> <p><i>Contributors:</i> In the 2nd half of the year, the strategy benefited from the underweight to China as Chinese equities underperform on continued worries over the U.S./China trade tensions. In a turnaround to the first half of the year, Brazil contributed positively to the relative performance of the fund on the back of the rally in the Brazilian equity market, following the Brazilian Presidential election win by market-friendly right wing candidate Jair Bolsonaro. In addition, strong stock selection came from Indonesia, Taiwan and Mexico. From a sector perspective, stock selection was very strong particularly in consumer discretionary, materials, and real estate.</p> <p><i>Detractors:</i> Detractors in the period included Wuxi Biologics. Its business model appears threatened by trade worries, which could impede the transfer of biological data and knowhow. Similarly, major players in the global tech hardware supply chain, such as Sunny Optical and Samsung Electronics, also suffered. Their outlooks were further clouded by expectations of a slowing equipment-replacement and upgrade cycle. Elsewhere, Cancun airport operator Asur sold off on the cancellation of the new Mexico airport. Overweights in materials and consumer staples were also detractors for the quarter.</p> <p><i>Positioning:</i> They are holding onto their high conviction positions. As a result, they retained their significant exposure to India, Brazil, Indonesia and Mexico. These positions contributed to performance in 2018. They retain a focused, quality portfolio – as risks have risen across equity markets, momentum styles have begun to lag and other styles such as quality have begun to outperform. Their quality strategy, especially from the second half of 2018, has fared better.</p>	<p>2 Rating Changed from "1" to "2" in January 2018</p>
Pinnacle Natural Resources (PNR) Absolute Return	<p>Returned -4.4%, outperforming the Bloomberg Commodity Index by 500 bps</p> <p><i>Contributors:</i> PNR's agriculturals within directional trading and relative value trading strategies contributed the most to performance. The combination of gas, power, carbon, coal trading and positioning in both the U.S. and Europe were the drivers of performance for the quarter. Physical strategies in metals and livestock also contributed marginally to gains. For the 2018 calendar year, all sectors, except for FX Rates, contributed to the Fund's performance.</p> <p><i>Detractors:</i> Losses in directional and relative value trading strategies in the energy complex and directional trading strategies in the metals sector detracted from performance. Small losses also came from base metals. Additionally, petroleum strategies detracted marginally from performance.</p> <p><i>Positioning:</i> As of end of the quarter, gross and net exposure were 6.8X and 0.75X, respectively. As of December 31, 2018, PNR had a total of 17 active underlying investments. The strategy held 29% Grains, 23% Natural Gas, 13% Livestock, 8% Crude Oil/products, 8% Precious Metals, 7% Electricity, 7% Base Metals, 4% Softs, 1% FX/Rates/Index.</p>	<p>1</p>

INVESTMENT MANAGER – Q2 FISCAL 2019 COMMENTARY

POSITIVE CONTRIBUTORS

	Commentary	Due Diligence Rating
<p>Grosvenor <i>Absolute Return</i></p>	<p>Returned -4.9%, outperforming the HFRI Fund of Funds Composite Index by 10 bps</p> <p><i>Contributors:</i> The Fund’s conservative positioning, specifically its limited directional exposure to broader equity and fixed income markets, was beneficial in mitigating losses amid the market declines during the fourth quarter. Most risk assets declined for the year, and many equity indices incurred peak-to-trough drawdowns in excess of -20%, compared to the Fund’s peak-to-trough of -5.0% in 2018. Within the relative value strategy, the Fund’s dedicated fixed income and currency volatility investments were noteworthy contributors to returns as volatility across asset classes rose sharply during the quarter.</p> <p><i>Detractors:</i> The equity strategy allocation was the portfolio’s largest detractor, with longer-biased investments particularly susceptible to the broader equity market drawdown. Modest losses were also incurred in the multi-strategy, macro, credit, and relative value allocations. The Fund’s quantitative strategy allocation was flat. Underperformance within the multi-strategy allocation was attributable to GCM Grosvenor’s Special Opportunities Fund (which pursues direct trading and co-investment activities) and an energy-focused multi-strategy specialist.</p> <p><i>Positioning:</i> GCM’s view is that in today’s late cycle economic environment, these types of actively managed strategies are particularly important, as they are capable of generating attractive absolute and relative returns in periods during which traditional asset classes may struggle. Many of these strategies generate lesser correlated return streams, which can provide prudent diversification to global investment portfolios. They are currently researching specific areas of dislocation to determine if and where value opportunities exist. Specifically, they are investigating hedged strategies in Emerging Markets and Asia, as well as a number of sector focused strategies which have fallen out of favor and may provide outsized opportunities in the coming year.</p>	<p>1</p>

INVESTMENT MANAGER – Q2 FISCAL 2019 COMMENTARY

DETRACTORS

	Commentary	Due Diligence Rating
Acadian International Equity	<p>Returned -14.5%, underperforming the MSCI EAFE by 200bps</p> <p><i><u>Detractors:</u></i> Growth factors such as earnings surprise predictor, which had worked previously, struggled, causing headwinds for momentum stocks. Q4 represented a capitulation in some of the best performing growth stocks that had become expensive. Key sources of negative active return included stock selection in the U.K., France, Australia, and Denmark. From a sector attribution standpoint, portfolio stock selection in healthcare, utilities, materials, and consumer discretionary detracted. Key negative holdings for the quarter were Aristocrat Leisure, an Australian slot machine maker reporting annual profits that trailed estimates; Peugeot, a French automaker that reported a decline in sales; Lundbeck, a Danish drug maker's treatment that failed in late-stage trial, Ubisoft, a French video game developer after it had fallen victim to a series of distributed denial-of-service attacks. Lastly, their small-cap tilt was a headwind to performance as larger companies tended to hold up better in Q4 and 2018 overall.</p> <p><i><u>Contributors:</u></i> More successful investments included stock selection and country positions in Germany, Japan, Brazil, S. Africa, along with stock selection in Switzerland. Key positive holdings for the quarter were Daito Trust Construction, a Japanese property developer; Swiss Life; Lufthansa; and Roche.</p> <p><i><u>Positioning:</u></i> Their top-down views show they have positive forecasts on telecom, banking, utilities, and food staples; negative forecasts on energy, semi-conductor, tech, pharma, and auto. From a country view, Portugal tops their forecasts supported by attractive valuations with an additional boost from quality and improved risk scores. Other top scorers include Israel and Japan. Hong Kong scores have also improved slightly but has a weak macro headwind such as trade competitiveness. Lastly, the US is their second weakest forecast since last quarter due to stretched valuations and increased equity volatility.</p>	<p>1</p>

INVESTMENT MANAGER – Q2 FISCAL 2019 COMMENTARY

DETRACTORS

	Commentary	Due Diligence Rating
Hosking <i>Global Equity</i>	<p>Returned -14.5%, underperforming the MSCI ACWI Index by 170 bps.</p> <p><i>Detractors:</i> Stock selection was negative with financials and communications being the largest detractors. The overweight to financials was the largest detractor on an individual sector basis and the portfolio's underweight to defensive areas (utilities, healthcare and staples) acted as a drag. From a country perspective, stock selection in North America detracted the most while Europe, Japan, and Asia Pacific ex. Japan marginally detracted. Top 2 holdings detracting from performance were AIG and Citigroup.</p> <p><i>Contributors:</i> Allocation to emerging markets proved a relative positive, as did the underweight to information technology. At the stock level, the top contribution to relative performance came from not holding Apple, followed by holdings in Belmond Ltd., and Jardine Matheson Holdings.</p> <p><i>Positioning:</i> The portfolio saw historically low turnover, at 8%, with purchases reflecting a continuation towards areas of the market that remain out of favor. The Amazon position continued to be trimmed. The case for financials remain as banks have expanding net interest margins and have been cost cutting, helping book value per share growth exceed the US stock market. With US shares looking relatively expensive, Emerging Markets continues to remain a better place as inflation rates, current account deficits, and debt coverage ratios are well-contained and most currencies are floating.</p>	<p>1</p>

Returns presented are net of investment management fees

INVESTMENT MANAGER – Q2 FISCAL 2019 COMMENTARY

DETRACTORS

	Commentary	Due Diligence Rating
Artisan Global Equites	<p>Returned -15.5%, underperforming the MSCI EAFE by 270 bps</p> <p><i>Detractors:</i> Some of their holdings whose fundamentals were among the strongest for the year detracted from performance. The worst performing sectors were those most exposed to the potential fall-out of ongoing global trade tensions, this was particularly true in the industrials and consumer sectors. Communication holdings also detracted. Fevertree, Temenos and Activision Blizzard were among biggest detractors from a holding standpoint.</p> <p><i>Contributors:</i> The portfolio’s health care holdings—though negative on an absolute basis—held up better than index peers. HDFC, Cree and Agilent—a new purchase in the quarter were some of the top performing holdings for the quarter. Underweights to materials and financials were also beneficial to the portfolio’s performance.</p> <p><i>Positioning:</i> The year’s relative volatility allowed them to be more active in the portfolio than in prior years. Their exposure to or exiting of campaigns which have become relatively less attractive, in favor of introducing new or adding to high-quality franchises trading at what they find to be compelling valuations. They remain positive on healthcare, energy, and software, driven by positive momentum; whereas automobiles, real estate, and utilities are viewed negatively. As part of their process, they continue to allocate assets to companies with the ability to compound profits in a reasonably wide range of economic scenarios.</p>	1
PIMCO Core Plus	<p>Returned 1.2%, trailing the Barclays US Aggregate Index by 40bps</p> <p><i>Detractors:</i> The strategy underperformed its benchmark as deductions from interest rate strategies more than offset contributions from currency and spread sectors. Specific detractors were the Non-U.S. duration strategies, including country selection in the eurozone and short duration exposure in select markets, positions in Agency and non-Agency MBS and Positions in high-yield corporates.</p> <p><i>Contributors:</i> The portfolio benefited from U.S. rate strategies, including duration, curve positioning, and instrument selection, underweight investment-grade corporate credit and tactical positions in select high-carry emerging market currencies.</p> <p><i>Positioning:</i> PIMCO remains tactical with currency positioning, particularly given less conviction in the overall direction of the dollar. They continue to underweight duration overall and maintain a preference for U.S. duration against rate exposure in other developed regions, including the U.K. and Japan. They also prefer intermediate portion of the curve against the long-end. Lastly, they are opportunistic in corporate credit, favoring housing-related credits and financials.</p>	1

INVESTMENT MANAGER – Q2 FISCAL 2019 COMMENTARY

DETRACTORS

	Commentary	Due Diligence Rating
PIMCO <i>Unconstrained</i>	<p>Returned 0.3%, trailing the Custom Index (25% High Yield/25% EMD/50% Barclays Aggregate) by bps 90 bps</p> <p><i>Detractors:</i> Short exposure to interest rates in select developed market countries, specifically Japan, Italy and the UK, detracted from performance as global yields rallied amid bouts of equity volatility and growth concerns. Exposure to investment grade and high yield corporate credits detracted from performance as both sectors sold off alongside weakness in equity markets. Holdings of Agency and non-Agency mortgage-backed securities also hampered performance as excess supply from the Fed unwind weighed on the sector. Exposure to U.S. TIPS detracted as breakeven inflation rates came under heavy pressure in concert with lower oil prices. Holdings of US dollar-denominated EM debt, specifically sovereigns, weighed on performance as the sector posted negative returns.</p> <p><i>Contributors:</i> Exposure to U.S. interest rates and curve positioning contributed to performance as yields fell across much of the curve in Q4, with the 10-year rate down 38 bps to end the year at 2.68%. Holdings of select high carry emerging market currencies, such as the Argentine peso and Turkish lira, contributed to performance as both currencies rallied, helped in part by favorable policy measures.</p> <p><i>Positioning:</i> Retain a defensive position on duration with a focus on relative value. Looking to selectively invest in corporate credit with a focus on high quality positions. Continue to diversify spread exposures, seeing value in Agency and non-Agency MBS and select relative value positions in EM debt. Favor long positions in higher yield EM currencies, such as the Russian ruble, Argentine peso, and Turkish lira, versus a basket of lower yielding Asian currencies, such as the Taiwanese and Singapore dollars. Favor the US dollar versus developed market currencies as well.</p>	1

Returns presented are net of investment management fees

INVESTMENT MANAGER – Q2 FISCAL 2019 COMMENTARY

DETRACTORS

	Commentary	Due Diligence Rating
<p>Wellington Opportunistic Emerging Market Debt</p>	<p>Returned -2.3%, underperforming the JP Morgan EMBI Global Index by 110 bps</p> <p><i>Detractors:</i> An underweight to China detracted from performance. An underweight to Brazil, given concerns about President Bolsonaro’s ability to pass fiscal reforms needed to stabilize debt. Negative security selection, specifically a lack of exposure to external sovereign debt, also detracted. Positioning within external quasi-sovereign debt, in Venezuela, negatively impacted performance. An overweight to the Ivory Coast hurt performance. Negative security selection in Kazakhstan, specifically an allocation to external corporate debt of Nostrum Oil & Gas, detracted from results.</p> <p><i>Contributors:</i> An out-of-index allocation to Qatar and Oman contributed to performance. Positive security selection in Croatia, specifically an allocation to EUR denominated sovereign debt, helped results. An overweight country allocation to Morocco enhanced results. Valuations remain fair to slightly cheap with a positive fundamental trend.</p> <p><i>Positioning:</i> Balancing stable emerging market fundamentals and attractive valuations against risks around US Federal Reserve policies, trade protectionism and China growth. They favor select frontier markets with IMF support and strong reform stories. They favor Gulf Cooperation Council (GCC) countries with reform momentum and attractive valuations relative to credit quality. Favor Central and Eastern European countries with improving fundamentals not recognized by markets. Underweight investment grade countries in Latin America where valuations are not attractive. Underweight much of Asia also due to lack of attractive valuations. Favor issuers in Eastern Europe and the Middle East over Asia and Latin America. Cautious on Mexico given the risks around new President AMLO’s policies.</p>	<p>1</p>
<p>Allianz Structured Alpha</p>	<p>Returned -4.1%, underperforming the 91 Day T-Bills by 460 bps</p> <p><i>Detractors:</i> Range-bound positions could not fully withstand the move of the VIX as the path of the S&P 500 in October and December were volatile. They had to restructure the entire book over several days in the second half of the quarter. To keep the cost contained they had to extend duration. Therefore, the range-bound spreads were extended diagonally with expirations into February and March. The cost appears to be manageable, but the tradeoff is that the book is longer-dated.</p> <p><i>Positioning:</i> 2018 was a difficult year for Allianz. They fell short of their alpha targets and delivered negative excess returns for the year. They believe they have kept the strategy in position for a profitable 2019.</p>	<p>1</p>

NEPC'S DUE DILIGENCE MONITOR

Investment Options	Manager Changes/ Announcements (Recent Quarter)	NEPC Due Diligence Committee Recommendations
PIMCO <i>Core Plus Unconstrained High Yield</i>	NEPC's Unfavorable News Committee recommended upgrading PIMCO from Watch to No Action.	No Action
Champlain <i>Non-U.S. Small Cap Equity</i>	NEPC Research was notified that health care analyst, Erik Giard-Chase has given his notice.	No Action
Strategic Global Advisors <i>International Small Cap</i>	NEPC Research was notified that Brett Gallagher has joined Strategic Global Advisors as President. Founder and CEO, Cynthia Tusan, will assume the role of Chairwoman of the Board of Directors for the firm. Elyse Waldinger also joined the firm as Chief Operating Officer.	No Action

NEPC Due Diligence Status Key	
No Action	Informational items have surfaced; no action is recommended.
Watch	Issues have surfaced to be concerned over; manager can participate in future searches, but current and prospective clients must be made aware of the issues.
Hold	Serious issues have surfaced to be concerned over; manager cannot be in future searches unless a client specifically requests, but current and prospective clients must be made aware of the issues.
Client Review	Very serious issues have surfaced with a manager; manager cannot be in future searches unless a client specifically requests. Current clients must be advised to review the manager.
Terminate	We have lost all confidence in the product; manager would not be recommended for searches and clients would be discouraged from using. The manager cannot be in future searches unless a client specifically requests. Current clients must be advised to replace the manager.

NEPC'S QUARTERLY DUE DILIGENCE DETAIL

Manager	Summary	Action
PIMCO <i>High Yield Core Plus Unconstrained</i>	The Unfavorable News Committee recommended upgrading PIMCO from Watch to No Action. The committee agreed. This recommendation was made after Stacy Schaus and PIMCO settled their litigation out of court. As a reminder, Ms. Schaus filed a lawsuit against PIMO in 21018 for age and sex discrimination.	No Action
Champlain <i>Non-U.S. Small Cap Equity</i>	NEPC Research was notified that health care analyst, Erik Giard-Chase has given his notice. He wants to go back to school full-time to study in the field of neuroscience and has given the firm a one-year notice, as he won't likely start school until 2020. Mr. Giard-Chase is one of two analysts covering health care. Robert Hallisey is the other health care analyst at the firm. The firm has contacted a recruiter to find a replacement. As a reminder, Scott Brayman leads the small and mid-cap team at the firm. While NEPC does not like seeing team turnover, we feel that there is enough notice for Champlain to find a suitable replacement that there should be no material impact and are recommending No Action.	No Action
Strategic Global Advisors <i>International Small Cap</i>	<p>NEPC Research was notified that Brett Gallagher has joined Strategic Global Advisors as President. Founder and CEO, Cynthia Tusan, will assume the role of Chairwoman of the Board of Directors for the firm. Elyse Waldinger also joined the firm as Chief Operating Officer. Brett has more than 35 years of investment industry experience and comes to SGA from Nile Capital. He spent 14 years with Artio Global Investors, including six years as Deputy CIO. Cynthia will remain a Portfolio Manager alongside Chief Investment Officer Gary Baierl, and three other portfolio managers. Cynthia will be running the newly formed SGA Board of Directors in addition to her portfolio management responsibilities. Elyse joins SGA with over 18 years of institutional investment operations experience and is responsible for oversight of the Operations and IT teams. As a reminder Joel Reynolds joined as Chief Compliance Officer in July of 2018. In September of 2018 John Whittaker left the firm. This decision was made by SGA as a strategic initiative to divide up his dual role of CCO/COO at the time which as now been filled by Elyse and Joel.</p> <p>NEPC Research is comfortable with the changes put in place by SGA. The investment team is led by Cynthia Tusan, CEO and Portfolio Manager, as well as Gary Baierl, CIO. They are supported by portfolio managers and research staff. SGA uses a team based approach throughout the investment process where a consensus is reached for all decisions. As a reminder SGA runs a quantitative process with PM override for risk controls. CIO Gary Baierl and the marketing team will report into Brett Gallagher. Nile Capital has served in an advisory role to SGA for marketing, operations and hiring since taking a minority stake in the firm in late 2015. NEPC Research recommends No Action</p>	No Action

The target return shown for each composite is a custom index, based on aggregated policy indices. This policy index asset weights the underlying policy indices of each option in the plan and the respective benchmark

The allocation, selection, and interaction effects are calculated using the custom index described above along with the policy or target weight of each composite

May not add up due to rounding

Absolute Return's Wtd. index Return is calculated using a weighting of the respective benchmarks for each underlying strategy part of the composite

ANALYTICS DEFINITIONS

Asset Allocation Effect - Measures VPIC's ability to effectively allocate their portfolio's assets to various asset classes. The allocation effect determines whether the overweighting or underweighting of asset classes relative to a benchmark contributes positively or negatively to the overall portfolio return. Positive allocation occurs when the portfolio is overweighted in an asset class that outperforms the benchmark. Negative allocation occurs when the portfolio is overweighted in an asset class that underperforms the benchmark and underweighted in an asset class that outperforms the benchmark.

Selection Effect - Measures VPIC's ability to select managers within a given asset class relative to a benchmark. The over or underperformance of the portfolio is weighted by the benchmark weight, therefore, selection is not affected by VPIC's allocation to the asset class. The weight of the manager in the portfolio determines the size of the effect -- the larger the manager, the larger the effect is, positive or negative.

Interaction Effect - The interaction effect measures the combined impact of VPIC's manager selection and manager allocation decisions within an asset class. For example, if VPIC had superior manager selection and overweighted that particular asset class, the interaction effect is positive. If VPIC had superior manager selection, but underweighted that asset class, the interaction effect is negative. In this case, VPIC did not take advantage of the superior manager selection by allocating more assets to that asset class.

TOTAL DOMESTIC EQUITY

SSGA S&P 500 CAP-WGT

Using a replication process, we purchase each security for the Strategy in the same capitalization weight as it appears in the S&P 500 Index. Replication results in low turnover, accurate tracking, and low costs. SSgA's internal liquidity has allowed the firm to acquire many of the benchmark constituents for free. These free trading opportunities have allowed SSgA to gradually reduce security-level misweights while avoiding the open market. This process has resulted in portfolios that look and behave like the benchmark, and do so at a very low cost. SSgA's passive equity process objective is to remain fully invested in the equity market at all times. To accomplish this, it holds a small amount of unleveraged exchange-traded S&P 500® futures contracts to maintain full exposure. SSgA tends to hold approximately 1-3% of the strategy's value in suitable CFTC approved index futures contracts. This position in futures also allows the firm to accommodate cash flows into and out of the portfolio on a daily basis and to equitize dividend receivables to achieve closer tracking.

SSGA S&P 500 CAP-WGT

SSGA S&P 500 EQUAL-WGT

The Strategy is managed using a "passive" or "indexing" investment approach, by which SSgA attempts to match, before expenses, the performance of the Index. SSgA will typically attempt to invest in the securities comprising the Index, in the same proportions as they are represented in the Index. In some cases, it may not be possible or practicable to purchase all of the securities comprising the Index, or to hold them in the same weightings as they represent in the Index. In those circumstances, SSgA may employ a sampling or optimization technique to construct the portfolio in question. From time to time securities are added to or removed from the Index. SSgA may sell securities that are represented in the Index, or purchase securities that are not yet represented in the Index, in anticipation of their removal from or addition to the Index. The Strategy may at times purchase or sell futures contracts on the Index, or options on those futures, or engage in other transactions involving the use of derivatives, in lieu of investment directly in the securities making up the Index or to enhance the Strategy's replication of the Index return. The Strategy's return may not match the return of the Index.

SSGA S&P 500 EQUAL-WGT

CHAMPLAIN

Champlain employs a fundamental, bottom-up approach to investing in equity assets. They believe that superior companies purchased at attractive valuations have the highest probability to wealth creation. Champlain seeks strong businesses with credible and sincere management and aims to buy shares of their stock at discounts to fair or intrinsic value. Portfolio construction applies sector weight guidelines and position size rules to manage risk. The portfolio will have some exposure to at least seven out of the eight largest sectors of the S&P 400, with a maximum weighting on 25% in any one sector. Individual positions will not represent more than 2% of the respective companies' outstanding shares and are limited to no more than 5% of assets under management. The portfolio typically holds 50-75 securities with average position sizes of 2%. The strategy's minimum market cap is \$1.5 billion at purchase and a maximum market cap of \$15 billion. In general, no more than 10% of portfolio in stocks with a market cap below \$2B and no more than 5% of portfolio in companies with market cap above \$20B.

ACADIAN

Acadian believes that the larger the pool of potential investments, the greater the potential opportunity an active manager has to add value. They believe that stocks and markets have many attributes that are related to potential outperformance, and that a successful investment approach must be multi-faceted and highly adaptable. They believe that objectivity is crucial to investment success. Acadian's quantitative process and extensive database allows them to apply their valuation techniques to over 40,000 stocks worldwide. They do not limit the universe other than to employ screens based on invest-ability and availability of data. For example, they only evaluate stocks that have sufficient daily trading volume to be appropriate for institutional investment. Other than these practical considerations, they consider our investment universe to encompass all institutionally investable stocks in the world.

MONDRIAN

The firm is an active value-oriented defensive manager. The firm's value driven investment philosophy is based on the belief that investments need to be evaluated in terms of their fundamental long-term value. The firm believes that the value of a company lies in its future income stream as dividends represent the most direct form of cash flow to a shareholder. The firm uses an inflation adjusted dividend discount model to derive the underlying value of a company. This methodology is applied consistently to individual securities across all markets and industries. The universe spans markets covered in the MSCI Indices and those developing markets with adequate investor protection and good repatriation procedures. The firm will then narrow the universe to a list of more than 1000 securities on the basis of value criteria, and then further reduce this to a shorter list of approximately 250 securities annually, for detailed fundamental analysis. The screens include basic value characteristics such as price to book, price to cash flow ratio, price to earnings ratio, and yield, as well as liquidity considerations. A focus list of approximately 80 securities is then created from that list of approximately 250 through fundamental research and deliberations of the Equity Strategy Committee. It is this list of securities on which more detailed fundamental analysis and financial modeling is carried out utilizing the dividend discount model, which is based on an evaluation of a company's future income stream, which is then discounted in real terms.

SSGA ACWI EX US

The MSCI ACWI ex US Index Strategy tends to hold each security that is held in the benchmark index, but the strategy will not be perfectly weighted in every index constituent on a daily basis. Holding securities in the perfect weights would require increased trading and therefore would incur costs. Thus, there will be securities in the fund that are either over- or under-weighted relative to the benchmark. The individual security mis-weights are very minimal, usually within 1 basis point. However, in aggregate, these small mis-weights can add up and result in tracking error if the mis-weighted securities' performance is volatile. SSgA seek to replicate the index by attempting to hold every security in the fund in its appropriate index weight. SSgA trade only when there is a change to the Index, when we have participant cash flows, or when we receive significant dividend income into the fund.

ARTISAN GLOBAL OPPORTUNITIES

Artisan's Global Opportunities strategy employs a fundamental investment process to construct a diversified global equity portfolio of companies across a broad capitalization range. The team attempts to identify companies that possess franchise characteristics that are selling at attractive valuations and benefiting from an accelerating profit cycle. Artisan's Growth investment team attempts to identify companies that possess franchise characteristics that are selling at attractive valuations, and benefiting from an accelerating profit cycle. The team believes selecting stocks exhibiting franchise characteristics, attractive valuations and accelerating profit cycles, and allowing stocks to progress through the three stages of capital allocation (Garden, Crop, Harvest® investing), increases the likelihood of delivering upside participation with downside protection.

HOSKING GLOBAL EQUITY

Hosking Partners' investment philosophy is an evolved variant of the 'Capital Cycle' approach. Each of portfolio managers constructs their own global portfolio, with the firm's portfolio being the aggregate of these sub-portfolios. Just as the 'Capital Cycle' drew them towards industries which were consolidating and, in consequence, improving profitability, so the more recently adopted 'filters' reinforce the selection of companies with latent profit and valuation improvement potential. For instance in addition to industrial consolidation, they favour firms with inside ownership (and attendant less liquid capital structures), and those that are suppressing profits or which are for whatever reason out of favour. They use the filters alone or in combinations. Many of the picks are contrarian and often impute to the portfolio a value-bias. However growth companies can also qualify for inclusion thus diluting the value orientation.

ABERDEEN

Aberdeen believes, given the inefficiency of markets, that competitive long-term returns are achieved by identifying high quality stocks at attractive valuations and holding for the long term. It is their belief that sound fundamentals drive stock prices over time. They employ a fundamental bottom-up investment approach based upon a rigorous and disciplined proprietary research effort which originates with direct company due diligence visits. Portfolios are constructed to maximize their level of exposure to the most attractive companies filtered from the stock selection process. They run a representative or model' unconstrained portfolio that contains approximately 30 - 70 stocks at any given time. Once a stock has received unanimous approval by the team, the senior investment team members then decide which portfolio category it should enter (i.e. country, regional, Global Emerging Markets) and at what weighting. The Head of Global Emerging Markets then has responsibility to ensure that the decision is implemented.

SSGA BARCLAYS AGGREGATE INDEX

The Strategy is managed using a "passive" or "indexing" investment approach, by which SSgA attempts to match, before expenses, the performance of the Index. SSgA will typically attempt to invest in the securities comprising the Index, in the same proportions as they are represented in the Index. In some cases, it may not be possible or practicable to purchase all of the securities comprising the Index, or to hold them in the same weightings as they represent in the Index. In those circumstances, SSgA may employ a sampling or optimization technique to construct the portfolio in question. From time to time securities are added to or removed from the Index. SSgA may sell securities that are represented in the Index, or purchase securities that are not yet represented in the Index, in anticipation of their removal from or addition to the Index. The Strategy may at times purchase or sell futures contracts on the Index, or options on those futures, or engage in other transactions involving the use of derivatives, in lieu of investment directly in the securities making up the Index or to enhance the Strategy's replication of the Index return. The Strategy's return may not match the return of the Index.

PIMCO CORE PLUS

PIMCO's investment process expects to generate above-benchmark returns by building diversified, risk-averse portfolios based upon their long-term secular outlook. This is achieved by analyzing fundamental global trends in such areas as political factors, inflation, volatility, growth, and currency, amongst others. The three to five-year secular outlook is the core element of their decision-making process, and serves as a framework for portfolio implementation. In applying the secular outlook to the portfolio, such tools as duration position, yield curve posture and sector allocation are expressed to best represent the firm's view on the macro-economic environment. Bottom-up analysis of specific securities is also an important part of the firm's philosophy. Bonds are evaluated on a rich/cheap basis and fundamental research determines strong portfolio candidates.

Annualized Excess Performance

PIMCO UNCONSTRAINED

The PIMCO Unconstrained Bond Strategy is an absolute return-oriented, investment grade quality fixed income strategy that embodies PIMCO's secular thinking, global themes, and integrated investment process without the constraints of a benchmark or significant sector/instrument limitations. The strategy is designed to offer the traditional benefits of a core bond portfolio - seeks maximum long-term return consistent with capital preservation and prudent management- but with higher potential alpha and the potential to mitigate downside risk to a greater degree than what is reasonably possible from traditional active fixed income management approaches as the strategy allows for more manager discretion to adjust duration exposure, allocate across sectors and otherwise express the firm's active views. The strategy is governed by PIMCO's investment philosophy and unique, disciplined secular investment process, which focuses on long-term economic, social and political trends that may have lasting impacts on investment returns.

BLACKROCK TIPS

In the management of an inflation-linked bond portfolio, BlackRock will utilize multiple strategies to outperform the index. These include: duration and yield curve positioning, technical supply/demand anomalies related primarily to the ILB auction cycle, seasonal factors related to non-seasonally adjusted inflation-linked indices, break-even spread between ILBs and nominal securities, and, if applicable, sector and country allocation. The team compares nominal yields with real yields and factor in their views on inflation. If the yield spread is less than the inflation rate, then ILBs are considered to trade cheaply to nominal bonds and have greater relative value. The portfolio currently holds about 31 positions, out of 27-29 issues in the benchmark. Turnover is moderate, at around 100-150%.

WELLINGTON OPPORTUNISTIC EMD

Wellington Opportunistic Emerging Markets Debt is a “best ideas” investment approach that seeks to generate attractive returns relative to an emerging markets debt benchmark, independent of traditional benchmark constraints. Blended Opportunistic Emerging Markets Debt approach will seek to take advantage of investment opportunities across the emerging markets fixed income spectrum, including hard and local currency-denominated sovereign, quasi-sovereign, and corporate debt, and their derivatives. Currencies will be used to both manage risk and enhance return. The portfolio is managed in a benchmark aware style; while the team is mindful of benchmark exposures, we may deviate considerably from the benchmark if we believe it to be justified by fundamental, valuation, and/or technical considerations.

SAVE THE DATE

MAY 7-8, 2019 | BOSTON PARK PLAZA | #NEPC_CONFERENCE

NEPC's 24th Annual Investment Conference

- Gradual or dramatic, the economic and political worlds around us are going through major transition. Whether it be global resources, climate, political power, technology, demographics or personal habits, adapting and advancing through these shifts has become a regularity. Most importantly, as we transition our daily processes, so do we transition our investment approaches. Please join us for **NEPC's 24th Annual Investment Conference on May 7-8, 2019** at the Boston Park Plaza Hotel, as we address the 'Transitions' we are experiencing and what lies ahead.
- Please reach out to Sarah Winrow at swinrow@nepc.com if you have any questions.
