State Retirement Initiatives:
Out of Crisis Comes Opportunity

November 16, 2015

Presented by:
Hon. Kathleen Kennedy Townsend
Founder, Center for Retirement Initiatives, Georgetown University
Managing Director, Rock Creek
77 percent of Americans surveyed are more afraid of outliving their saving in retirement than of death itself, (according to a survey by financial-services company Allianz of people in their late 40s found)

Those who are married with dependents are even more terrified, with 82 percent saying that running out of cash is a more chilling prospect than death (according to a survey by financial-services company Allianz of people in their late 40s found)
Do Not Go Quietly Into the Good Night

➢ From **2001 to 2014**, retirement has remained Americans’ top financial concern

86% of Americans believe that the United States faces a retirement crisis

Source: Gallup
Why?

- Why Is There a Crisis?

  - Americans are living longer
  - Meager Savings
  - Quantity and Quality of Employer Based Retirement
Booming Into Retirement

➢ Americans are living longer

➢ Less Smoking

➢ More Exercise

➢ Better Healthcare
Meager Savings

Source: Employee Benefit Research Institute

- 11% have $250,000 or more
- 11% have $100,000-$249,999
- 9% have $50,000-$99,999
- 9% have $25,000-$49,999
- 8% have $10,000-$24,999
- 16% have $1,000-$9,999
- 36% have $0-$1,000
- 52% have less than $10,000

The information set forth above is not intended as, nor should it be interpreted to be, an offer to buy or sell any security or to participate in any investment or trading strategy. The business described in this Presentation may not be suitable for all investors, and may not be suitable for some investors who qualify to purchase interests.
Meager Savings

- If you give Americans the opportunity to save they believe they could do it, if employers made it easy

- 70% of Americans believe they could save $25 more per week by giving up:
  - Eating out / ordering in (46%)
  - Soft drinks or snacks (13%)
  - Movies, videos, DVDs or streaming (12%)
  - Coffee from specialty shops (11%)
  - Lottery tickets (8%)

- But, half of all Americans can’t raise $2,000 in 30 Days ... Because it’s not easy!

- $120,000 needed for a worker making $30,000 to reach 78% of pre-retirement income

Source: Retirement Confidence Survey, EBRI, Greenwald and Associates, Time Magazine
Reduction in Quantity

➢ **Reduction of the *Quantity* of Plans Offered by Employers**

➢ Half of working Americans were not offered a retirement account by their employer — the result of a longer trend in which, from 1999 to 2013, the percentage of workers being offered such plans declined from *61% to 51%*

➢ In 1978, 2/3 of dedicated retirement assets were held in traditional pensions; by contrast, only 1/3 are today

(Source: The Hamilton Project, Brookings Institute)
The Key

is employer-based plans
Who has pensions?

**ECONOMIES OF SCALE**

- Unions: 82%
- Large Employers: 74%
- Government: 82%

*Adam Smith, The Wealth of Nations*
Who doesn’t?

SMALL BUSINESSES

- At employers with fewer than 10 workers, just 17% of workers have access to a retirement plan.
Most Small Businesses Don’t Offer Any Plan

➢ Employer sponsored retirement plan by firm size

Source: The Hamilton Project, Brookings Institute
State Initiatives

- 25 States Have Considered or Enacted Private Sector Retirement Initiatives

Source: Georgetown University's Center for Retirement Initiatives

- = legislative proposal and/or study in 2015
- = laws enacted (2012-present)
- = recent state efforts (2012-2014)
What Should Be Features of Savings Plan

- Universal – all employers
- Reasonable monthly retirement benefits
- Automatic payroll deduction
- Simple
- Affordable
- Portable
- Professionally managed
- Low fees
- Pooled risk
Auto-Enrollment

➤ Simple & Effective

➤ 85% of employees started saving sooner than they would have without auto-enroll

97% of enrolled employees were satisfied with the service and glad it was offered

90% of those who opted out were still glad it was offered

Source: Retirement Made Simpler
Who Chooses to Save with Auto-Enrollment

80%

- Women, minorities & young people opted out at lower rates than whites, males and older workers
- Opt-out rates did not differ significantly between 3% vs. 6% contribution rates

Guaranteed Returns
What Does it Cost to Guarantee Returns?

- Historically, low return guarantees would have had no effect on replacement rates because while they are cheap they don’t guarantee a reasonable return.

- On the other hand, high guarantees are prohibitively expensive and the costs of these guarantees significantly reduce the final return to the retiree.

- The only way to provide high return guarantees is if there is a sponsor who is willing to offer the guarantee on a less expensive basis, i.e., DB plans.

## Options for Structuring Guaranteed Returns

<table>
<thead>
<tr>
<th>Options</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Guarantee the rate of return on the assets accumulated in the Program.</td>
<td></td>
</tr>
<tr>
<td>2. Contract with a third-party insurance company to provide a guaranteed rate of return on assets accumulated in the Program.</td>
<td></td>
</tr>
<tr>
<td>3. Offer a stand-alone investment option, such as a stable value fund, that provides an explicit guaranteed rate of return on invested assets.</td>
<td></td>
</tr>
<tr>
<td>4. Offer a stand-alone investment option that guarantees the investment through yields generated or an insurer-provided guarantee.</td>
<td></td>
</tr>
<tr>
<td>5. Offers a money market fund, which guarantees principal value of investments.</td>
<td></td>
</tr>
</tbody>
</table>

Survey found respondents preferred more risk with better returns over low risk with low returns

The retirement savings program could be set up with different fund options. Two examples are described below:

a. A “Balanced Fund” that has a mix of 60% stocks and 40% bonds. This is expected to provide significant investment growth over the long term. However, performance will vary a lot from year to year, and there is a 1-in-50 (2%) chance of losing some of the principal (your contributions) after 20 years.

b. A “Money Market Fund,” an interest-bearing account that protects the principal. You will never lose your deposit, but interest rates may fail to keep pace with inflation.

Low / Average / High Investment Gains after investing $50/month for 20 years

<table>
<thead>
<tr>
<th>OPTION (A)</th>
<th>Balanced Fund</th>
</tr>
</thead>
<tbody>
<tr>
<td>High</td>
<td>$23,100</td>
</tr>
<tr>
<td>Average</td>
<td>$12,200</td>
</tr>
<tr>
<td>Low</td>
<td>$4,700</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>OPTION (B)</th>
<th>Money Market</th>
</tr>
</thead>
<tbody>
<tr>
<td>High</td>
<td>$7,700</td>
</tr>
<tr>
<td>Average</td>
<td>$5,300</td>
</tr>
<tr>
<td>Low</td>
<td>$3,800</td>
</tr>
</tbody>
</table>

Note: Projections are net gains (total account balance minus $12,000 total contributions) based on historical financial market returns. Past performance does not guarantee future results. High = cutoff for top 5% of outcomes. Low = cutoff for bottom 5% of outcomes.
Half (51%) prefer a Balanced Fund compared to 23% who prefer a Money Market Fund. Another 10% do not have a preference and 16% don’t know.

- Preference for the Balanced Fund increases with education and income.
Target Date Fund Option

- Option: Vanguard Target Retirement Fund

- IRA: 17bps (2,000 people)
- 401K: 10bps (2,000 people)

<table>
<thead>
<tr>
<th></th>
<th>10bps Fee</th>
<th>50bps Fee</th>
<th>The Difference</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Top 5%</strong></td>
<td>$45,656</td>
<td>$42,571</td>
<td>$3,085</td>
</tr>
<tr>
<td><strong>Average</strong></td>
<td>$22,952</td>
<td>$21,400</td>
<td>$1,552</td>
</tr>
<tr>
<td><strong>Bottom 5%</strong></td>
<td>$9,564</td>
<td>$8,834</td>
<td>$730</td>
</tr>
</tbody>
</table>

Choice & Default

- While people say they like choices, too many choices make people freeze, as they do not know what to do; therefore, they do not act.

- The vast majority – particularly low income participants – “choose” the default plan.

- It is critical, therefore, that the default plan should meet the needs of low income workers.

Source: Greenwald & Associates 2015
Default

- Connecticut default investment option is: target date fund

- Connecticut default payout option is:
  - One half mandatory monthly payment
  - Other half is also monthly payment unless specifically requested for otherwise
Possible Design Plans

Individual Retirement Account (Non-ERISA)

Multiple Employer ERISA Plan (like a 401K)
- w Partial Lifetime Income (Annuity) Portion
- w No-loss Guarantee

Clearinghouse/Exchange/Marketplace

Source: Josh Gotbaum, Brookings Institution Retirement Security Project.
DOL is now encouraging consideration of ERISA plan designs (401K like) that better achieve Secure Choice Goals

- ERISA plans allow optional employer contributions. State IRAs do not
- ERISA protects spouse & death benefits; IRAs do not
- ERISA plans permit much higher annual contributions than IRAs, generally $18,000 vs $5,500 per year
- ERISA plans have pooled funding & much lower fees than IRAs
- ERISA plans can more easily incorporate protects against loss & lifetime income
- ERISA plans have a wider range of available choices, either pooled or non-pooled
- ERISA plans will be state-sponsored

DOL is now working to clarify that there will be no employer fiduciary duty under a state-sponsored plan

Source: Josh Gotbaum, Brookings Institution Retirement Security Project.
The Benefits of Pooled Investments

- **Multi generational risk allocation**
  - Multi generational pooling means that individual does not have to decrease risk close to retirement. The younger generations in the pool can absorb the risk and the older individual can enjoy the higher returns associated with greater risk.

- **Professionally Managed**
  - More easily resists the buy high, sell low phenomena.

- **Access to More Asset Classes**
  - More balanced portfolio because asset classes that don’t require “daily liquidity” can be included.

- **Fees**
  - Lower fees because spread over thousands of people.
Individual Characteristics and Post-Retirement Income

Individual Characteristics

Age: 25
Retirement Age: 65
Life Expectancy: 85*
Salary: $30,000
Annual Contribution Rate: 3%

Market Assumptions

Inflation: 2.5%
Fixed Income Returns: 4.0%
Equity Returns: 7.0%
60% Equity, 40% Fixed Income Return (nominal): 5.8%

Post-Retirement Income from Personal Savings:

$677 Monthly
(27% of salary)

Post-Retirement Income from Social Security:

$1273 Monthly
(51% of salary)

Total Post Retirement Income:

$1950 Monthly
(78% of salary, i.e., replacement ratio*)

* According to Aon consulting a total replacement ratio target of 77%-78% is required to maintain a person’s pre-retirement standard of living

* Life expectancy of a person reaching 65 is 84.5 for men and 86.6 years for women
With Individual Accounts, Retirement Income Fluctuates Depending on When People Retire. That makes them less secure, not more

Only 17% of cohorts will meet retirement income target of 78%

➢ The retirement benefit can fluctuate significantly depending on the year of retirement

Source: Rock Creek
Pooling assets will enhance investment returns and increase the probability of individuals meeting their retirement targets.

The percentage of cohorts meeting the retirement income of 78% replacement rate doubles to 33%.
