NEPC Update

Highlights of Second Quarter Happenings at NEPC

NEPC Research

Recent White Papers Posted

- 2Q Market Thoughts – “Is It the Beginning of the End or the End of the Beginning? The Next Chapter for Growth Assets” (April 2014)
- *The Endowment Model: Striking the Balance Between Simple & Complex* (May 2014) – Scott F. Perry, CAIA, Partner
- *Hangover Redux: The Impact of Capital Overhang on Private Equity Investing* (May 2014) – Melissa Mendenhall, Consultant, Private Markets Research

NEPC News

- NEPC is pleased to announce the selection of MSCI's BarraOne and HedgePlatform for risk management and reporting. “This broader relationship with MSCI will provide NEPC with leading risk tools for both total plan risk and hedge fund risk. We are particularly excited about the plans to integrate the InvestorForce Reporting platform with BarraOne,” noted Dan Kelly, Chief Operating Officer of NEPC.

Professional Staff Updates

New Client Strategy Team

- Provides high level Research and Consulting Services to all practice areas and develops sophisticated client Research. The team offers a centralized senior level resource pool for all clients that require expertise in asset allocation, defined contribution and alternative assets.
- Led by **Chris Levell, ASA, CFA, CAIA, Partner** focusing on asset allocation.
- Supported by **Ross Bremen, CFA, Partner** (Defined Contribution) and **Sean Gill, CFA, CAIA, Partner** (Alternative Assets).

NEPC Supports Principles for Responsible Investment

NEPC is proud to announce that we have become a signatory and partner with Principles for Responsible Investment initiative (PRI). The United Nations-supported Principles for Responsible Investment (PRI) Initiative is an international network of investors working together to put the six Principles for Responsible Investment into practice. Its goal is to understand the implications of sustainability for investors and support signatories to incorporate these issues into their investment decision making and ownership practices. The PRI Initiative has quickly become the leading global network for investors to publicly demonstrate their commitment to responsible investment, to collaborate and learn with their peers about the financial and investment implications of ESG issues, and to incorporate these factors into their investment decision making and ownership practices. For more information on PRI, please visit <http://www.unpri.org/>.

Market Review

- **Volatility for nearly all asset classes remains historically low as major asset class returns pushed higher during the quarter**
- **A revision of first quarter US GDP growth to -2.9% was mostly shrugged off by markets that have assumed a strong rebound for the second quarter**
- **Investors continue to digest the Fed's planned tapering of bond purchases and viewed Fed policy statements as relatively dovish**
- **The ECB's move to cut its main lending rate and impose a negative excess deposit rate for banks was met with tepid investor reaction**
- **Broad fixed income assets continued to rally as appetite for yield pushed high yield spreads to post-crises lows**
- **Emerging market assets continued their recovery as large investor inflows returned to equity and debt markets**
- **Instability in Iraq and Ukraine attracted a fair share of global headlines with modest market impact other than a spike in oil prices**

- **Global Equities**

- US stocks advanced in the second quarter, repeatedly reaching record highs as investors overlooked Q1 economic weakness, welcomed Q2 economic strength, and embraced still-accommodative central bank policy.
- Large cap stocks outperformed small cap stocks, with the S&P 500 Index returning +5.2% versus +2.1% for the Russell 2000 Index.
- International equities gained +4.1% in the second quarter, according to the MSCI EAFE Index, underperforming domestic and emerging markets.
- Emerging markets rallied to a 12-month high, with the MSCI Emerging Markets Index returning +6.6% for the quarter. Returns were bolstered by improving conditions in the Ukraine, positive election results in India, and better economic conditions in China.

- **Global Fixed Income**

- Fixed income investments rallied with interest rate and credit assets benefiting from yield-hungry investors and markets digesting relatively dovish monetary policy statements.
- The 10-year Treasury yield fell almost 20 basis points during the quarter, finishing at 2.5%.
- Despite record new supply, investment grade credit posted strong performance, with spreads narrowing 7 basis points to 96 basis points.
- The US Credit Index gained +2.7% and the Long Duration Credit Index returned +5.0% in the second quarter.
- High yield bonds returned +2.4%, aided by the decline in Treasury yields and a tightening of credit spreads.
- Emerging market debt has been a clear winner in the first half of the year following a challenging 2013. Local and external currency debt, as measured by the JP Morgan GBI-EM Index and JP Morgan EMBI+, had a stellar second quarter, returning +4.0% and +5.8%, respectively.

- **Commodity Markets**

- Commodities posted modest gains in the second quarter with the Dow Jones UBS essentially flat while the GSCI returned +2.7%.
- Poor weather conditions in the growing regions, combined with severe cold weather, sparked supply related rallies earlier in the quarter in corn and natural gas before reversing course and trading downward during the second half of the quarter.
- Tensions in the Middle East pushed energy prices higher while record low livestock inventories in the US caused cattle prices to spike.

- **Hedge Funds**

- Hedge Funds gained +1.9% for the second quarter, according to the Credit Suisse Hedge Fund Composite, compared to +5.2% for the S&P 500 and +2.0% for the Barclays Aggregate.
- Most hedge fund strategies were in the black, with the exception of short-biased equity and some relative value strategies, with the Credit Suisse Dedicated Short Biases Index finishing down -2.3% for the quarter. Credit Suisse Convertible Arbitrage and Equity Market Neutral posted losses of -0.1% and -0.3%, respectively.
- The Credit Suisse Global Macro Index was up +1.6% and the Credit Suisse Managed Futures Index gained +5.1% as many systematic managers were able to capture trends in the equity and bond markets.
- Within sectors, technology and healthcare specialists continue to struggle, finishing flat in the second quarter, although still on positive ground so far this year.

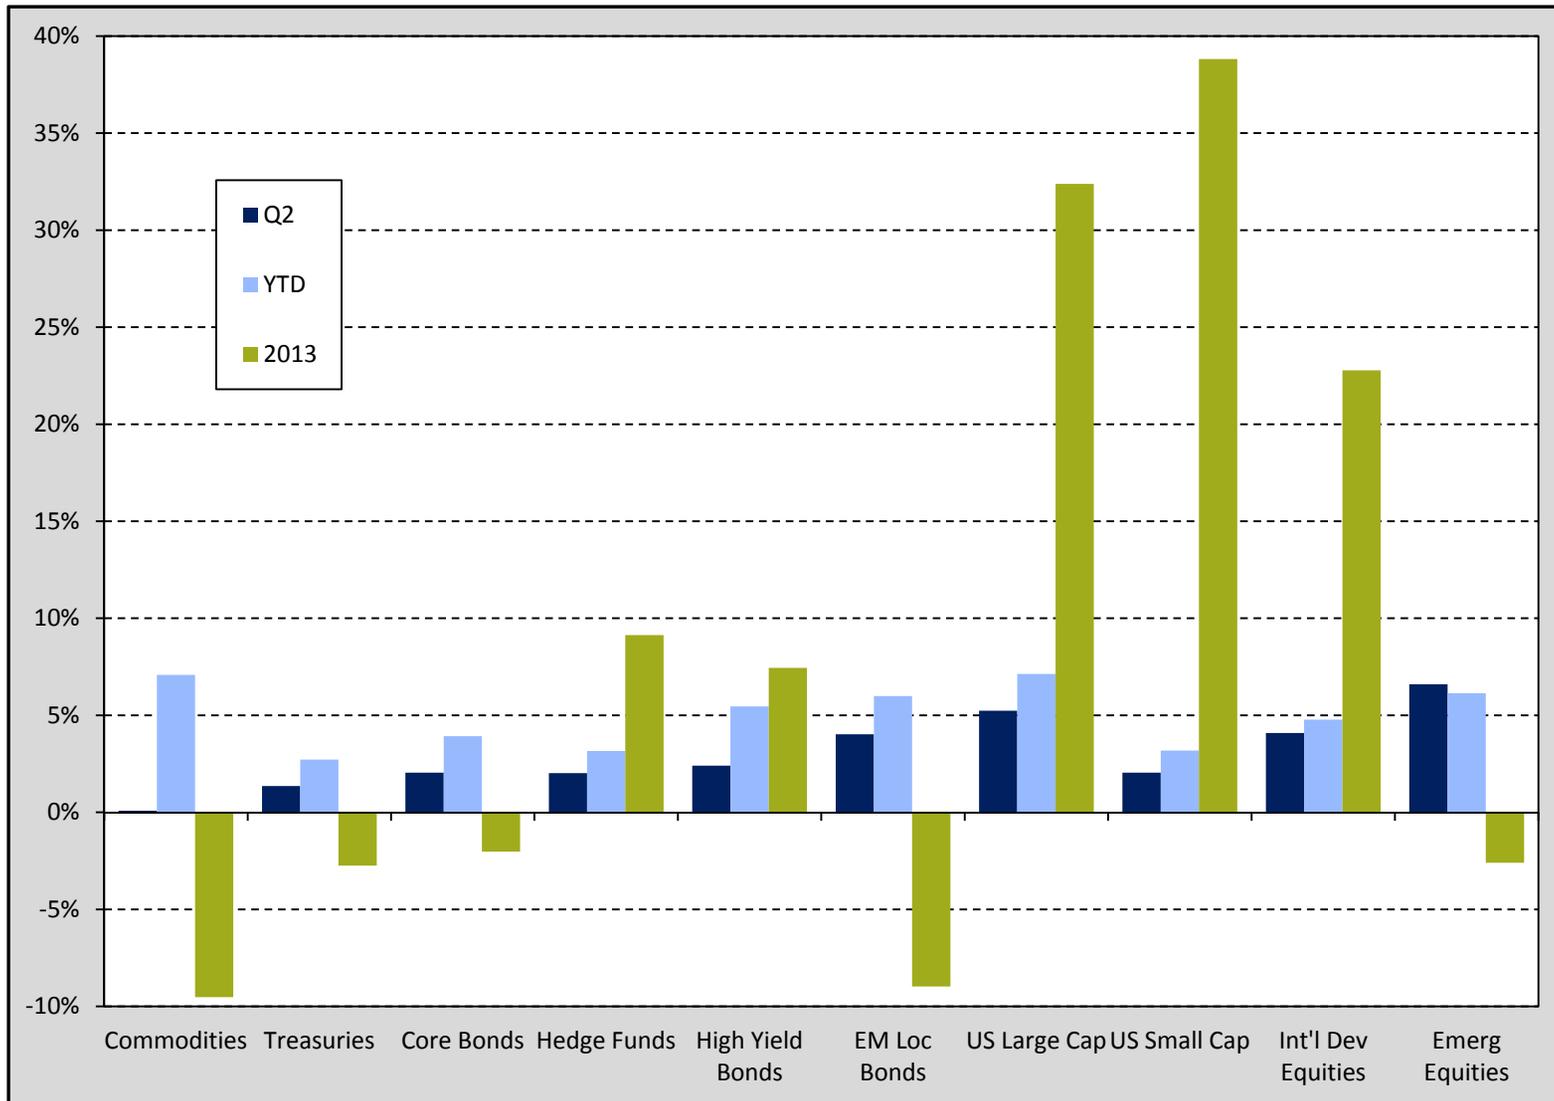

- **Private Markets**

- New private equity commitments totaled \$173.1 billion in the first half of the year, putting 2014 on track to be the fifth straight year of increasing commitments.
- Buyout and growth equity funds raised \$88.5 billion in the first half of 2014, with mega buyout firms accounting for 31% of all buyout/growth funds.
- Venture Capital raised \$27.2 billion, with funds raised in the first half of 2014 nearly matching the 2013 total of \$27.7 billion of new VC funds.
- Mezzanine funds, facing competition from senior and unitranche lenders, raised only \$5.2 billion.
- Secondary funds raised \$14.5 billion, eclipsing the 2013 funding total of \$13.2 billion, as a wave of large funds start to closings.

- **Real Estate**

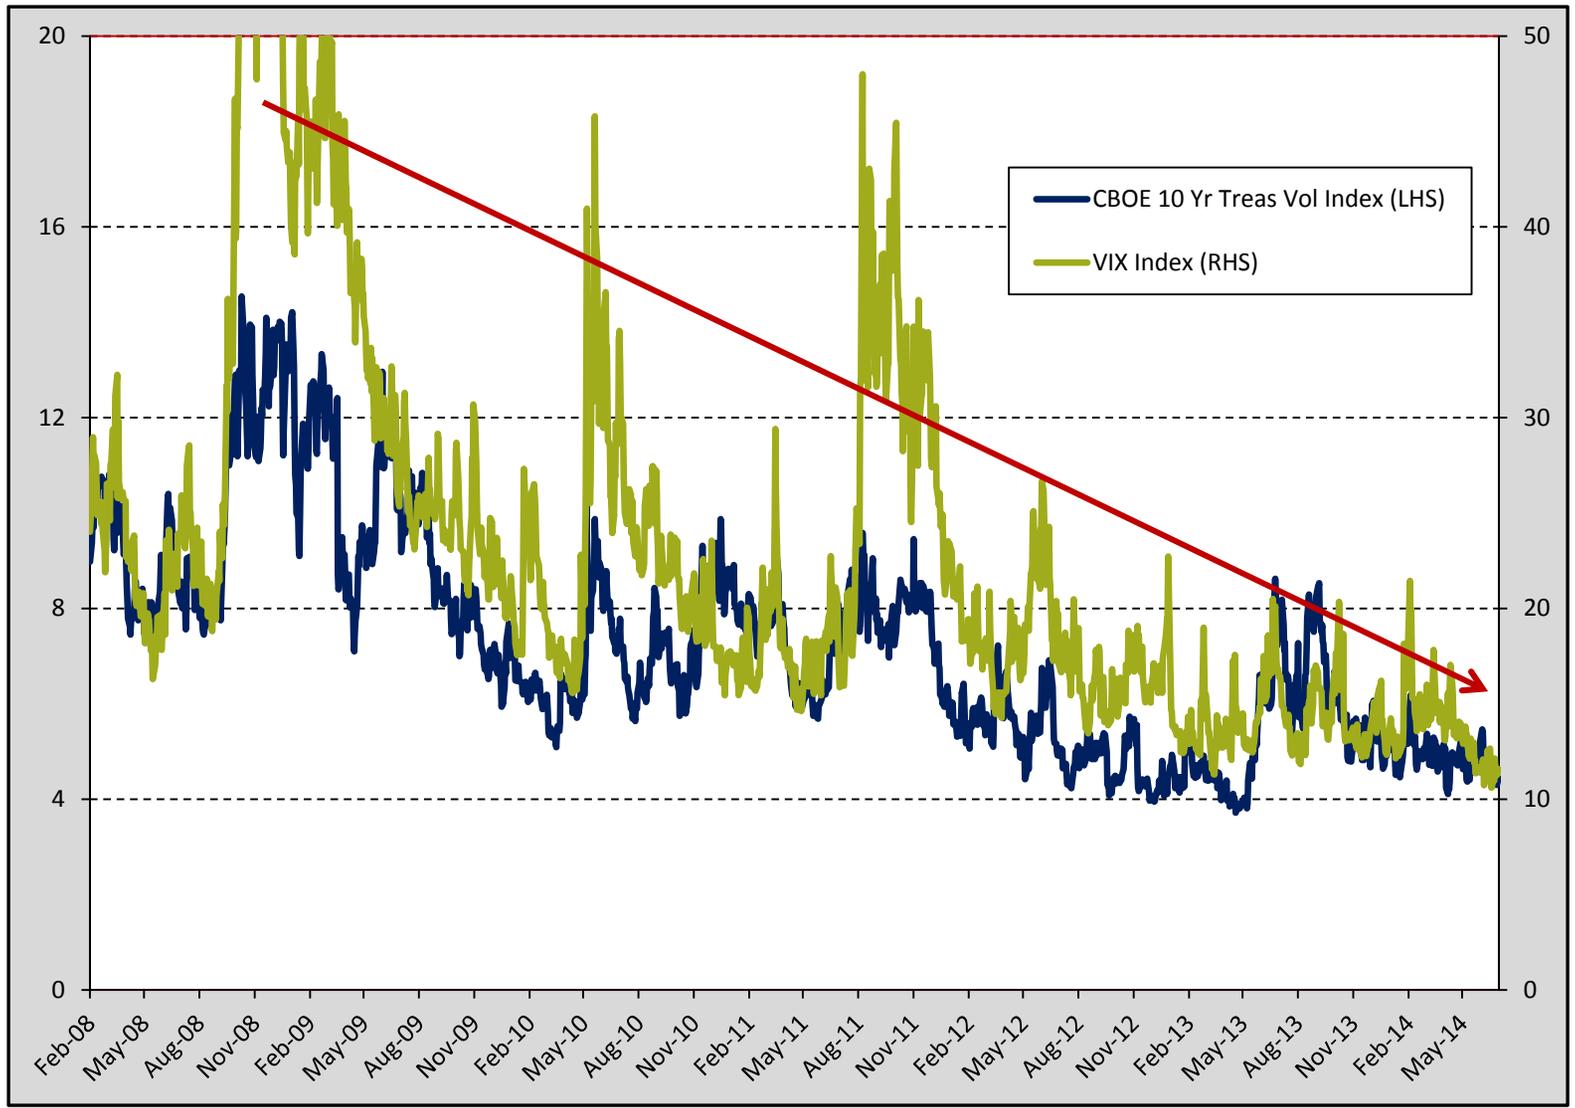

- NEPC remains neutral on core real estate in the US, positive on non-core real estate strategies such as value-add and opportunistic, and neutral on debt strategies (both in US and Europe).
- The main concerns for US core real estate (and US real estate, broadly) continue to be plentiful capital that is driving up pricing, and the market's expectation for higher future interest rates and their impact on capitalization rates and capital values.

Broad Market Indices are Mostly Positive in 2014

Uncertainty Regarding the Pace of Fed Policy Firming Remains

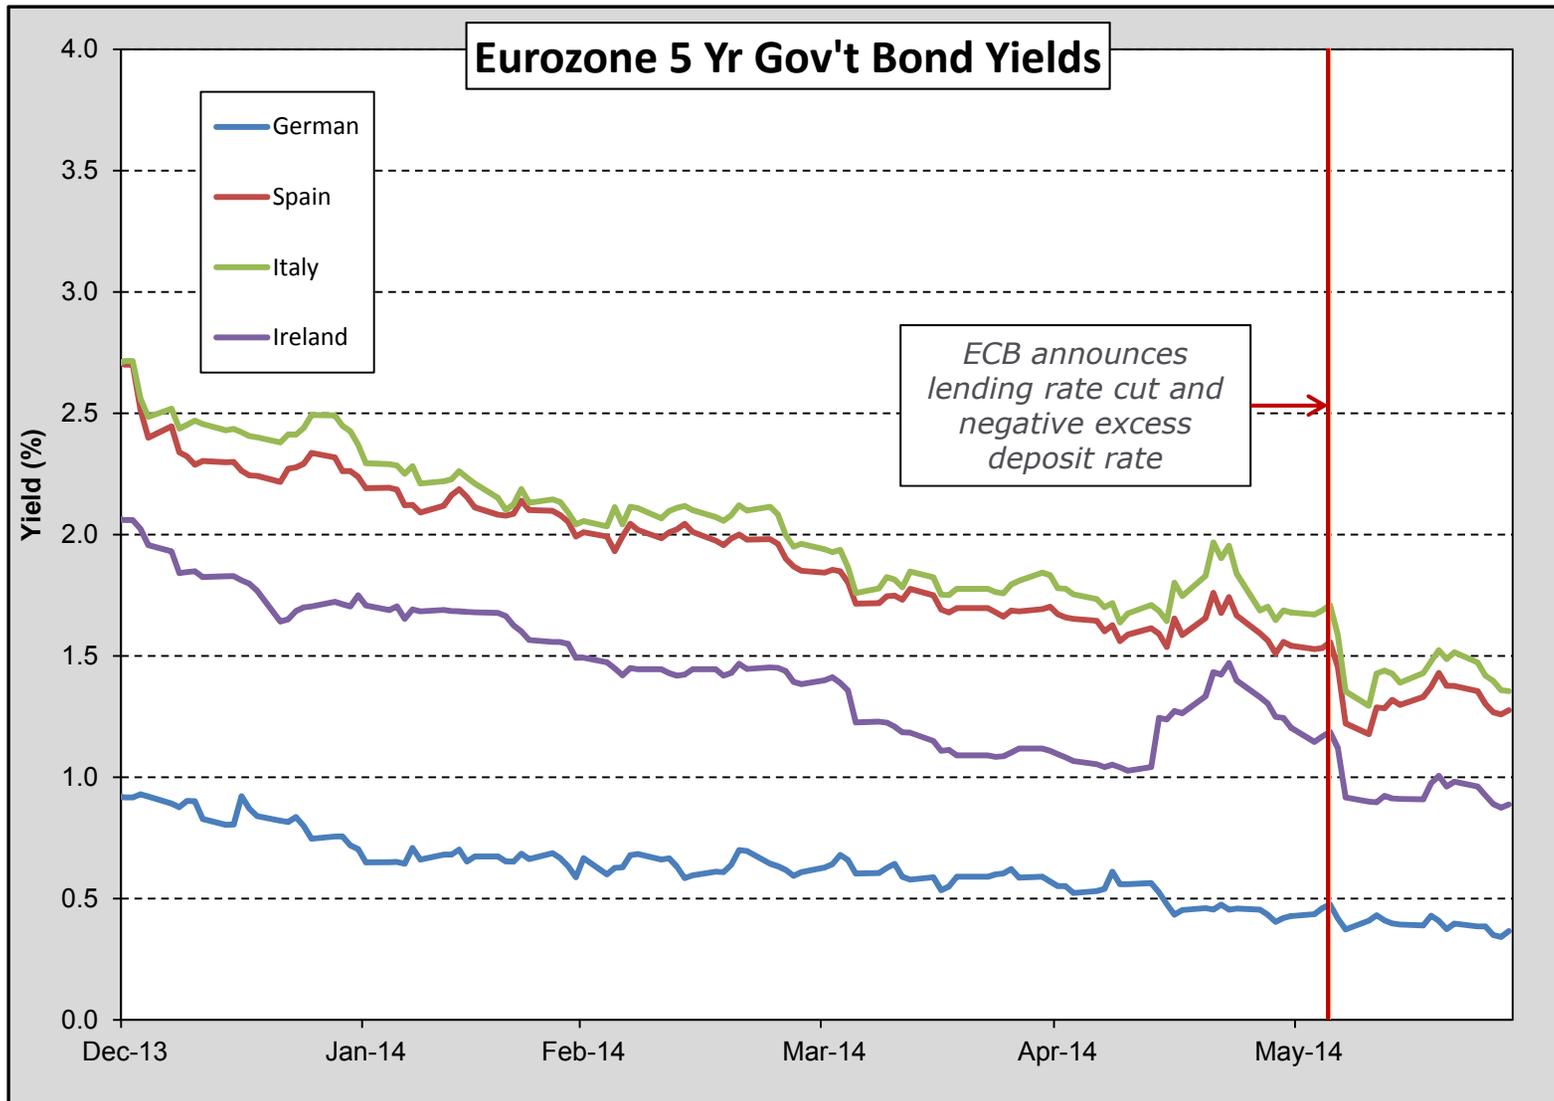

- **Fed has delivered relatively unified messages on the pace of taper and thoughts on US economy**
- **However, significant uncertainty remains on pace of raising the target Fed funds rate**
- **Though markets expect rates to rise, pace and path are unclear**

Each shaded circle represents the value (rounded to the nearest ¼ percentage point) of an individual participant's judgment of the appropriate level of target federal funds rate at the end of the specified year or over the long run

Source: Bloomberg as of 3/31

- **Interpreting and understanding the low volatility environment is a key challenge**
 - Low volatility can persist for long periods as a tailwind to markets but can also lead to complacency as excesses build in capital markets
 - Assess portfolio risk exposure and determine reasonable levels of portfolio liquidity and dry powder for future opportunities
- **Persistent low volatility may obscure underlying economic risks**
 - Global growth expectations remain subdued and deflation
 - EM balance of payment concerns remain as some countries slow the pace of reforms
 - China growth softens as credit growth continues to expand
 - Geopolitical risks pushing oil prices higher
- **As taper of QE concludes, potential for increased volatility as markets seek visibility into the Fed's monetary policy for 2015**
- **Valuations across many asset classes appear stretched**
 - Excluding EM, equity P-E ratios are above long-term averages
 - Credit spreads continue to tighten globally from insatiable demand
- **NEPC themes remain consistent**
 - Investors would be wise to rebalance to policy targets and maintain portfolio risk balance
 - Allocate to emerging markets and private markets for higher returns in a low return world
 - Look for opportunities to be dynamic – particularly in credit markets

Note: Plan attribution calculations are returns based and the results shown reflect the composites shown. As a result, the total returns shown may vary from the calculated returns shown on the performance report. The target return shown for each composite is a custom index, based on aggregated policy indices. This policy index asset weights the underlying policy indices of each option in the plan and the respective benchmark. The allocation, selection, and interaction effects are calculated using the custom index described above along with the policy or target weight of each composite. May not add up due to rounding.

Reporting Methodology

- The client's custodian bank is NEPC's preferred data source unless otherwise directed. NEPC reconciles custodian data to manager data. If the custodian cannot provide accurate data, manager data may be used.
- Trailing time period returns are determined by geometrically linking the holding period returns, from the first full month after inception to the report date. Rates of Return are annualized when the time period is longer than a year. Performance is presented gross and/or net of fees as indicated on each page.
- For managers funded in the middle of a month, the "since inception" return will start with the first full month, although actual inception dates and cash flows are taken into account in all Composite calculations.
- This report may contain forward-looking statements that are based on NEPC's estimates, opinions and beliefs, but NEPC cannot guarantee that any plan will achieve its targeted return or meet other goals.

It is important to note the following characteristics of many non-traditional investment strategies including hedge funds and private equity:

1. Performance can be volatile and investors could lose all or a substantial portion of their investment
2. Leverage and other speculative practices may increase the risk of loss
3. Past performance may be revised due to the revaluation of investments
4. These investments can be illiquid, and investors may be subject to lock-ups or lengthy redemption terms
5. A secondary market may not be available for all funds, and any sales that occur may take place at a discount to value
6. These funds are not subject to the same regulatory requirements as registered investment vehicles
7. Managers are not required to provide periodic pricing or valuation information to investors
8. These funds may have complex tax structures and delays in distributing important tax information
9. These funds often charge high fees
10. Limited partnership agreements often give the manager authority to trade in securities, markets or currencies that are not within the manager's realm of expertise or contemplated investment strategy

Information Disclaimer

- Past performance is no guarantee of future results.
- All investments carry some level of risk. Diversification and other asset allocation techniques are not guaranteed to ensure profit or protect against losses.
- Some index returns displayed in this report or used in calculation of a policy, allocation or custom benchmark may not be available from the source or may be preliminary and subject to change.
- NEPC's source for portfolio pricing, calculation of accruals, and transaction information is the plans custodial bank. Information on market indices and security characteristics is received from other sources external to NEPC. While NEPC has exercised reasonable professional care in preparing this report, we cannot guarantee the accuracy of all source information contained within.
- This report is provided as a management aid for the client's internal use only. Performance contained in this report does not constitute a recommendation by NEPC.
- This report may contain confidential or proprietary information and may not be copied or redistributed to any party not legally entitled to receive it.
