Market Review

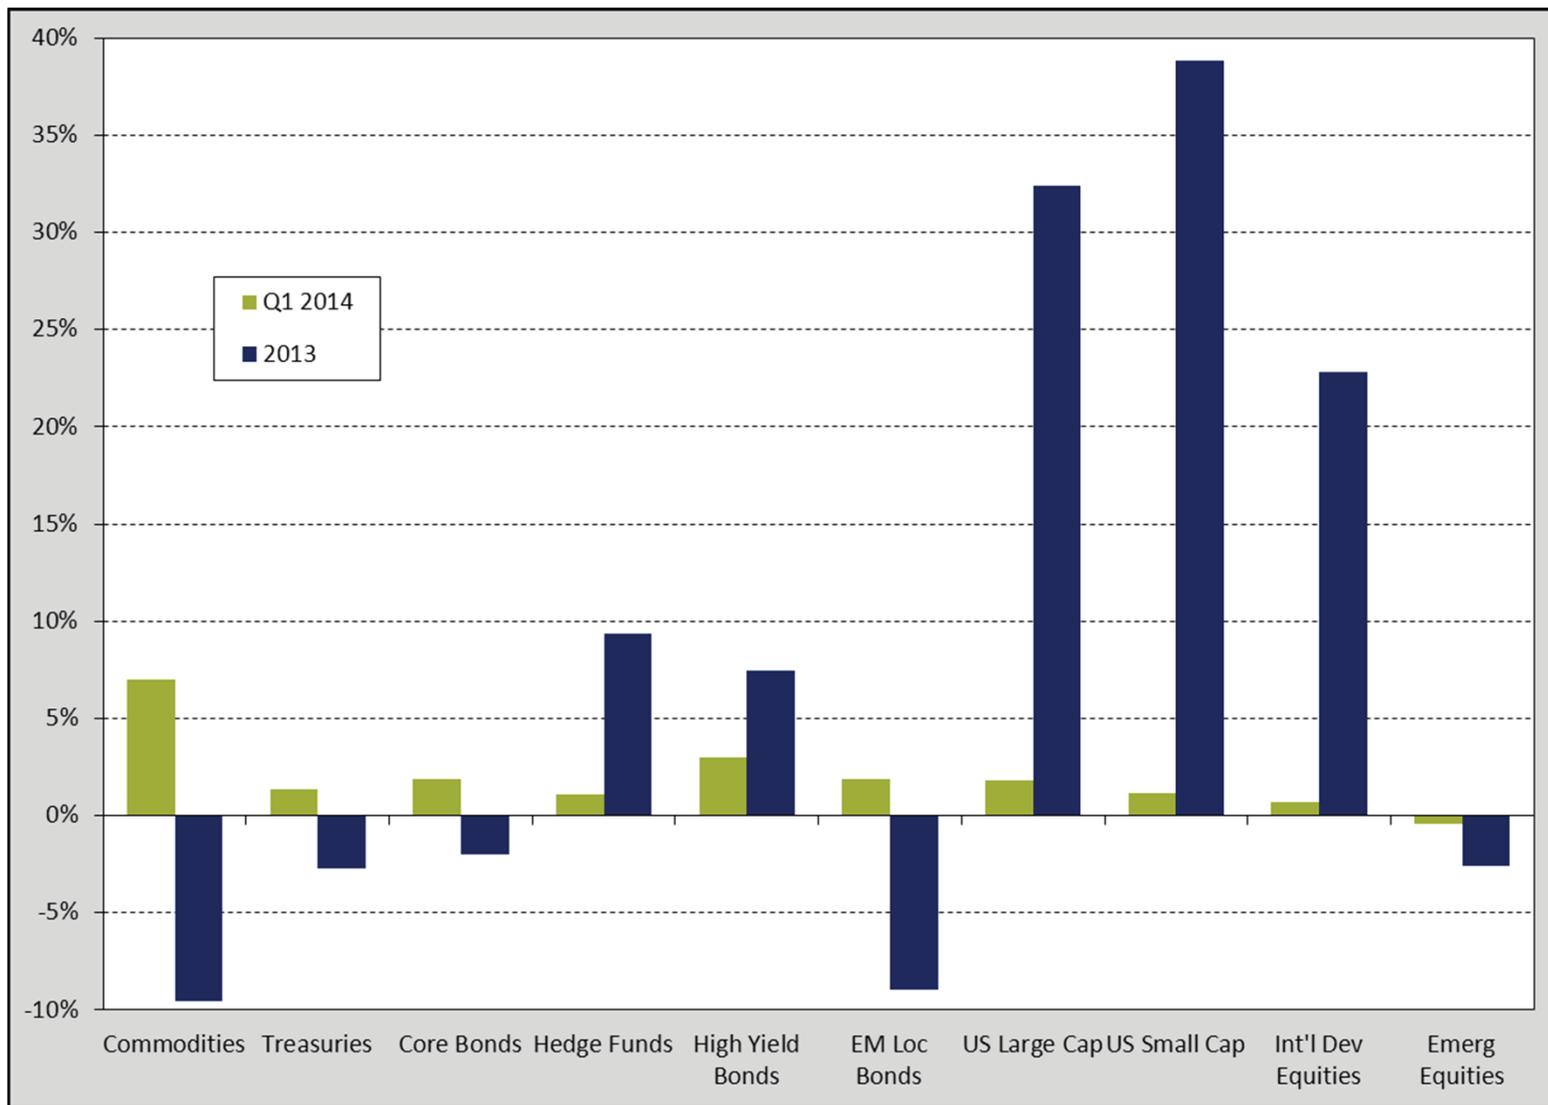

Positives

- **Continued slow and steady economic growth**
 - A bit slower in the first quarter due to weather (maybe offset in Q2?)
 - Deleveraging continuing
- **Early stages of Taper generally accepted by marketplace**
 - Though priced in “normalization” of rates appears optimistic
- **Developed world inflation is low**
 - Allows Fed continued flexibility to work through Taper
- **Emerging markets made some progress on adjustments**
 - Finally experiencing positive flows and early signs of positive performance
- **Volatility remains subdued and markets relatively stable**

Negatives

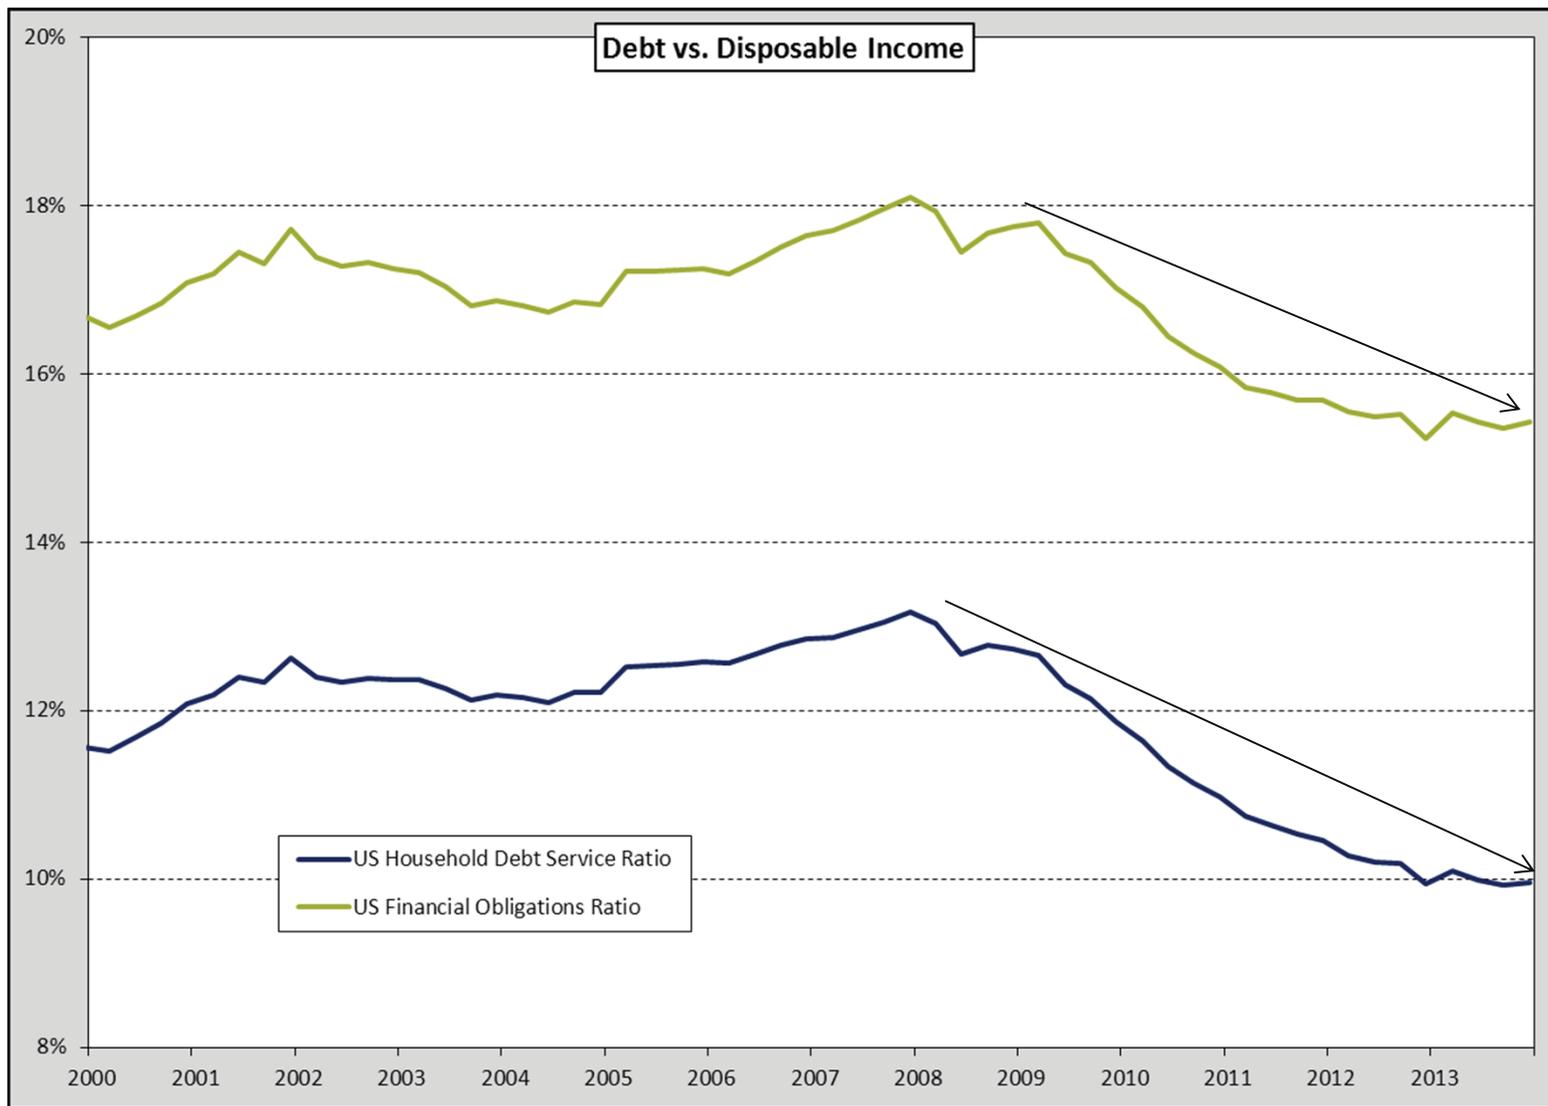

- **Potential geopolitical instability**
 - Russian invasion of Crimea has minimal economic impact
 - But tensions between Russia and West could have spillover effects
- **Benign market environment in Europe obscures challenging underlying economic conditions**
- **Inflation is low...maybe too low**
 - Global monetary stimulation has offset deflationary pressures
- **Continued slowing growth in China has global implications**
 - Could bring Chinese credit issues to forefront
- **Valuations beginning to stretch above long-term averages**
 - Developed Equity P-Es above median
 - Credit spreads approaching 2006-07 levels

Reporting Methodology

- The client's custodian bank is NEPC's preferred data source unless otherwise directed. NEPC reconciles custodian data to manager data. If the custodian cannot provide accurate data, manager data may be used.
- Trailing time period returns are determined by geometrically linking the holding period returns, from the first full month after inception to the report date. Rates of Return are annualized when the time period is longer than a year. Performance is presented gross and/or net of fees as indicated on each page.
- For managers funded in the middle of a month, the "since inception" return will start with the first full month, although actual inception dates and cash flows are taken into account in all Composite calculations.
- This report may contain forward-looking statements that are based on NEPC's estimates, opinions and beliefs, but NEPC cannot guarantee that any plan will achieve its targeted return or meet other goals.
